

# Joint Stock Company Alfa-Bank

## Key Rating Drivers

**Negative Sector Outlook:** The revision of the Outlook on Joint Stock Company Alfa-Bank's (Alfa) ratings to Negative from Positive captures the emerging pressures on the broader banking sector stemming from the coronavirus outbreak, lower oil prices and the economic downturn. While the ultimate economic and financial-market implications of the coronavirus pandemic are unclear, Fitch Ratings considers the risks to Alfa's credit profile skewed to the downside, which resulted in the revision of the Outlook on Alfa's ratings to Negative.

**Significant Resilience Remains:** Alfa's IDRs are driven by its intrinsic credit strength, as expressed by the 'bb+' Viability Rating (VR). The ratings continue to capture Alfa's well-established domestic franchise, historically strong execution, low impaired loan ratios, healthy bottom line performance in the past several years, and reasonable capital and liquidity buffers. In Fitch's view, Alfa's financial profile, and therefore the ratings, could probably tolerate a short-lived, sharp economic contraction in 1H20 if this is followed by stabilisation in 2H20.

**Asset Quality to Weaken:** Alfa's impaired loans (defined as Stage 3 loans under IFRS 9) amounted to a moderate 4% of gross loans at end-2019. Fitch expects asset quality to deteriorate in the medium term, particularly in unsecured retail lending (21% of gross loans), as Alfa's unsecured retail loan growth was significantly above the sector average in 2018-2019. Some corporate loans may also generate impairment losses. Risks are higher for foreign currency loans (26% of gross loans) due to a 20% devaluation of the Russian rouble in 1Q20.

**Pressure on Profit:** Fitch expects Alfa's total comprehensive income (2019: 15% of average equity) to fall in 2020 due to higher loan impairment charges. Alfa's pre-impairment profit amounted to 5% of average gross loans in 2018-2019, providing the bank with significant capacity to absorb losses. Pre-impairment performance in 2020 will, however, moderately deteriorate due to weaker transactional income and lower loan growth.

**Moderate Regulatory Capital Ratios:** At end-2019 Alfa's Fitch Core Capital (FCC) ratio was a reasonable 14%, but regulatory capitalisation is weaker due to tighter statutory risk-weights. At end-1Q20 Alfa's regulatory core Tier 1 ratio was 8.75%, which is just 75bp higher than the statutory minimum, including fully loaded buffers. However, the core Tier 1 ratio should increase by 230bp after the audit of regulatory 1Q20 profit, which includes large FX gains.

**Strong Funding, Liquidity:** We believe that the current economic downturn will not result in material pressure on Alfa's funding and liquidity profile. It is mainly deposit-funded and its funding mix benefits from a high share of on-demand current accounts, resulting in significant stability and granularity of the funding base. Alfa's contractual repayments of wholesale funding in 2020 are a moderate USD1.5 billion, while Alfa's liquid assets, including cash, interbank and bonds, exceeded USD17.4 billion or a high 34% of total liabilities at end-2019.

## Rating Sensitivities

**Operating Environment:** The ratings could be downgraded if the economic contraction caused by the pandemic turns out to be significantly sharper or more prolonged than currently anticipated, and results in material weakening of Alfa's asset quality and performance. Conversely, the ratings could be affirmed, and the Negative Outlook removed, if the economic downturn does not result in significant erosion of Alfa's financial profile, and if the Russian economy stabilises after a short-lived contraction.

**Risk Appetite in Retail:** Upside potential for Alfa's ratings is limited in the near term, given the negative outlook on the Russian banking sector. However, in the medium term, stabilisation of the economy, with satisfactory performance of retail lending and moderation of retail loan growth, could result in an upgrade.

In October 2019, Fitch revised Alfa's Support Rating Floor to 'BB-' from 'B', and upgraded its Support Rating to '3' from '4', to reflect an improved record of state support to privately owned banks in Russia, as evidenced by the bail-out of senior unsecured creditors at three medium-sized Russian private banks that failed in 2017. The rating action also captures the absence of any current plans to introduce comprehensive senior creditor bail-in provisions into Russian legislation. Alfa's 'BB-' Support Rating Floor reflects its moderate systemic importance as the fourth-largest bank in Russia with a 4% market share and substantial (in absolute terms) deposit base.

## Significant Changes

### Negative Outlook on Operating Environment

The economic pressure resulting from the spread of COVID-19 and the lower oil price are credit negative for banks in Russia. Fitch's baseline is for Russia's GDP to contract by 3.3% in 2020 before returning to 2.5% growth in 2021. In March 2020, Fitch revised the sector outlook for Russian banks to negative.

Weaker asset quality will be the main source of pressure on Russian banks' credit profiles. We expect increases in stage 2 and stage 3 exposures in corporate lending at most banks due to the drop-off in economic activity and weaker consumer demand in most sectors. Higher loan impairment charges will weaken banks' bottom line performance in 2020. Additional pressures on performance come from weaker commission income, lower lending growth and potentially also some margin compression.

### Credit Risks Stem from Unsecured Retail Lending

Alfa's retail loan impairment charges amounted to a low 3% of average retail loans in 2019, but we expect these to increase as higher unemployment and unpaid leave could impair borrowers' capacity to service debt. Alfa's appetite for growth in unsecured retail lending was materially above the market average in 2018-2019, so additional risks come from portfolio seasoning. As a mitigating factor, in 2019 Alfa's average gross interest income in retail was a high 22% of average retail loans, reflecting Alfa's business focus on higher-priced products. This provides a significant safety margin against potential spikes in impairment charges.

We view mortgage loans (5% of gross loans) as generally low risk. Mortgages were growing fast in 2019, and the management plans to further expand their share in retail loan portfolio.

### Good Quality Large Corporate Loans, but Some Risks May Emerge

At end-2019 Stage 3 and Stage 2 exposures were a moderate 4% and 5%, respectively, of Alfa's gross corporate loans. In Fitch's view, these ratios will go up during the horizon of a Rating Outlook.

Alfa's corporate loan book is generally of sound quality, at least judging by the largest loans. The industry structure of Alfa's corporate book largely resembles that of the broader Russian economy. We believe that the economic downturn should primarily affect trade and commerce borrowers (7% of Alfa's gross loans), construction and real estate (7%) and transport (5%). SME borrowers are also risky, but although Alfa was growing fast in SME lending in 2018-2019, this portfolio remains relatively small (3% of gross loans). Oil and gas (12%) borrowers may also suffer, due to the slump in oil prices and weaker revenues, but these are among the largest borrowers in the country and should have at least some resilience.

Foreign currency (FC) loans (26% of gross loans) may be particularly vulnerable due to the 20% devaluation of the Russian ruble in 1Q20, but many of Alfa's largest corporate loans are among the largest Russian exporters, and so should still have access to FC revenues.

### Reasonable Resilience Amid Operating Environment Shock

Although we expect Alfa's pre-impairment profit (PIP) to weaken in 2020, it should remain reasonable compared to additional impairment charges. Alfa's PIP amounted to a reasonable 5% of gross loans in 2018-2019. The recognition of losses in corporate lending should be gradual, as many corporate loans are secured with hard collateral, and Alfa has historically been one of the strongest Russian banks in terms of collateral foreclosure and problem loan recoveries. In addition, in the worst case scenario, Alfa's proven ability to de-leverage, supported by a generally short-term loan book, may ease the capital pressure if needed.

### Regulatory Capital Ratios to Improve

In 1Q20 Alfa booked large FX gains; these are currently captured in Tier 2 capital, but will move to core capital after the audit of the regulatory accounts, resulting in a 230bp boost to regulatory core Tier 1 ratio by the end of April. This will bring the uplift of Alfa's regulatory capital ratios over statutory minimums (including buffers) in line with most higher-rated banks in Russia. Alfa's capital ratios are inversely correlated with the strength of the rouble, which reduces risks to solvency in a sharp economic downturn.

## Debt Ratings

### Debt Issued by JSC Alfa-Bank and Alfa Bond Issuance plc

Debt Rating Class	Rating
Senior unsecured debt	BB+
Tier 2 subordinated debt	BB-
Additional Tier 1 notes	B

### Debt Issued by ABH Financial Limited (through Alfa Holding Issuance plc)

Senior unsecured debt	BB
-----------------------	----

Source: Fitch Ratings

The senior unsecured debt issued by Alfa is rated in line with Alfa's IDRs, assuming average recovery prospects in the event of default.

Alfa's 'BB-' subordinated debt rating is notched down twice from its VR, reflecting higher loss severity relative to senior unsecured creditors.

The additional Tier 1 (AT1) perpetual notes are rated at 'B', four notches lower than the bank's VR. The notching reflects (i) deep subordination of the perpetual notes relative to senior unsecured creditors, resulting in higher loss severity; and (ii) Alfa's option to cancel coupon payments at its discretion, resulting in additional non-performance risk.

The write-down trigger on the bank's AT1 securities is the regulatory core Tier 1 ratio falling below 5.125%. Alfa can omit coupons on these securities at its sole discretion. There is no specific trigger which would oblige Alfa to omit coupons before hitting the 5.125% core Tier 1 ratio. However, if the bank's capital ratios fell below minimum levels including buffers (e.g. 8% for core Tier 1) then the bank would be obliged to submit a capital recovery plan to the Central Bank of Russia (CBR). In Fitch's view there would be at least moderate risk that any such plan would include the omission of coupons on the AT1 securities.

Senior unsecured debt issued by ABH Financial Limited (ABHFL), Alfa's holding company, is rated at 'BB', which is in line with ABHFL's IDRs. We notch ABHFL down once from Alfa's IDRs to capture the absence of any consolidated regulation for the two entities due to them being incorporated in different jurisdictions.

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board(SASB).

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Company Profile; Management & Strategy; Risk Appetite

Employee Wellbeing	1	n.a.	n.a.
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Company Profile; Financial Profile

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Operational implementation of strategy	Management & Strategy
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal/compliance risks; business continuity; key person risk; related party transactions	Management & Strategy; Earnings & Profitability; Capitalisation & Leverage
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Company Profile
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Management & Strategy

CREDIT-RELEVANT ESG SCALE	
How relevant are E, S and G issues to the overall credit rating?	
5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
